Ground Zero
via fax

Dear Mr. Bakka,

Boycott Colorado, Inc. is the organization which originally called for a global boycott of the state of Colorado due to passage of Amendment 2. To date, we have been highly successful in getting over 100 groups to join the boycott representing a loss of well over \$100,000,000 within the first 3-4 months after Amendment 2 passed. Most of those boycotting are mainstream "straight" organizations. However, the nationally recognized gay groups are not only endorsing the boycott but honoring it as well, including the March on Washington.

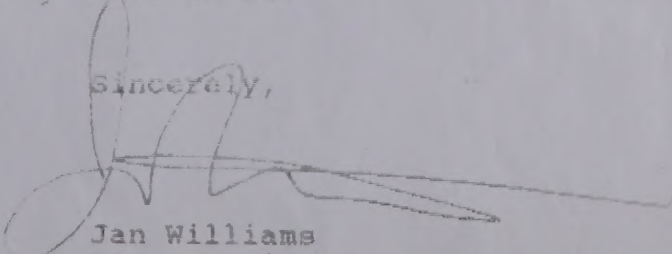

We oppose any organized plan to encourage gays from around the nation to come to Colorado Springs for a march. We would greatly appreciate it if you did not pursue your plans to do just that as it would only cause us to have to follow you and contact those you might influence to convince them not to spoil the boycott.

The media pounces upon anything that looks like we are lightening up on the boycott and on anything that they can use to make the gay community in Colorado look divided against itself. They would have a field day ripping the gay population of Colorado apart if you succeeded in diluting the efforts of the boycott.

Surely you are aware that the militant fundamentalists who passed Amendment 2 off on us in Colorado will not let up on their assault. We must play hardball with them and we absolutely will not, will not make any exceptions to the Boycott!

I hope I have made our position perfectly clear. If not, please call and let us discuss the situation. Either BCI President Terry Schleder or I will be more than glad to do so.

Sincerely,

Jan Williams
Vice President, Communications
